

Jesse Wayne Singleton III

Profession

Material Testing and Science
Service Engineer; USMC Veteran

BIO

Jesse “Wayne” Singleton III was born in Atlanta, Georgia. He grew up in Lithonia as the oldest of 3 children. As an adolescent, Wayne spent most of his free time as an avid gamer or looking for local pickup games of basketball and/or football. Just weeks after graduating high school, he decided to join the United States Marine Corps. After completing his Military Occupational Specialty school, Wayne became a communications and micro-soldering technician. As a young Marine, Wayne married his beautiful wife Stephanie in 2007. After 2 successful combat tours and 8 years of faithful service, Corporal Singleton was medically retired with a good conduct discharge. He crossed over to civilian life and became a field service engineer for a material testing and science company, ZwickRoell. At Zwick, Wayne initially travelled throughout the United States calibrating, installing, and repairing material testing machines. On occasion, Wayne travels to the home market in Ulm, Germany for trainings and testing exhibitions. This summer marks Wayne’s 7th year at Zwick, where he now trains and provides support for field service engineers throughout North America as the Technical Manager. Wayne and Stephanie have four children, Saniya, Jeremiah, and (twins) Jacob and Jayden. Wayne still enjoys the hobbies of sports and gaming, so family time at the Singleton home is comprised of fun, family competition either playing board games, sports or video games.
