

Faith - Be all in or nothing at all. God needs you to keep building your Faith no matter your life, your circumstances and challenges. Faith is built on what you don't see, but believe! This is the central piece of Legacy Driven Foundation.

Earn It - We work for ours. You are blessed when the work is done, then you earn the title and/or position. Put the work in and watch the blessings come.

Pray, then Pray Again - Be consistent and pray with your heart. Don't worry about using big words or saying a certain thing. Just talk to God just like anyone else, but be true to what's on your heart. He hears you!

Focus - Focus on your craft, family and have tunnel vision for what matters to you. Don't be concerned about what others think, just stay on the purpose you've been given in life right now.

Actions Speak Louder - We listen, but we watch the actions of people. The actions are where the essence of a person is, so be mindful. Don't get caught up on words, but watch and learn!

U Decide Your Latitude - Through prayer, focus, work ethic and earning your way to greatness will

become the latitude for your life. We don't do lazy....at all. So, go get your life young lady and man. Be Legacy Driven!

Leave Room For God - Live life to the best of your ability, but always leave room and know God can and will intervene on your behalf. When the weight of life happens, be patient and allow room for God to show out and show up in your life. #essential

Manage U - As a student said recently, I gotta mind my own business! You are responsible for your own actions or lack thereof. You can't control anyone else. So, just keep working on managing your emotions and stay positive through it all.

Love Your Support - When you're feeling low, or even high on life. At the end of the day, your support system of friends, family, teachers and more also will define your latitude. When those that love you show you through their actions, love them back 100%. It's nothing like having folks in your corner throughout life.
